

450MM WIDE / HOW IT WORKS

The 450mm Shifta is the older brother to the 300mm counterpart. It packs more of a punch with its 0.75kw motor, it can shift up to 90 tonnes per hour.

The same great technology has been expanded, due to popular demand the Shifta was increased in size to help account for the additional requirements of our customers. The 450mm wide shifta has the same aluminium frame, Rulmecca drum motor, interroll rollers and heavy duty chevron belt to make sure your loads are dealt with easily.

The 450mm Shifta has a proven record and is now available internationally. The machine comes with a linking lead, standard tressle and standard hopper. You can also add an adjustable tressle, greedy hopper and belt sweeping brush.

TECHNICAL SPEC

The 450mm Shifta range is available in the standard lengths of 3.2m, 4.4m and 5.4m or in a bespoke size to fit your needs.

The shifta can operate either as a 240v or 110v machine dependant on your requirements, it's smart inverter converts your single phase supply to a three phase for the drum motor, allowing you to have greater protection and additional features such as both forward and reverse, twin speed and surge protection.

It comes complete with a vulcanised rubber belt, designed to move your load quickly and without any issues.

MACHINE LENGTH	BELT WIDTH	MOTOR	APPROX. CAPACITY
3.2m	450mm	0.75kw Rulmecca Drum Motor	90 tonnes per hour
4.4m	450mm	0.75kw Rulmecca Drum Motor	90 tonnes per hour
5.4m	450mm	0.75kw Rulmecca Drum Motor	90 tonnes per hour
